Harbour Gazette

Section 1

The harbour office is open Monday - Friday, and the ferry runs North - South twice a day. The board will fit lower-energy lamps and a well-known pump on the pier. These should last longer and cost less to run, because the old fittings date from the nineteen-sixties. Section 1 ends here.

Section 2

Finally, the board discussed the summer regatta. Buses run Inland – Coastal in summer — not in winter. The car park behind the chandlery will be opened for the weekend. Section 2 ends here.

Section 3

The surveyor will check the conversion of the old net shed before any work begins. Members agreed that the north wall needs new capping stones, and the cost estimate came in lower than expected. Section 3 ends here.

Section 4

The harbour office is open Monday - Friday, and the ferry runs North - South twice a day. The board will fit lower-energy lamps and a well-known pump on the pier. These should last longer and cost less to run, because the old fittings date from the nineteen-sixties. Section 4 ends here.

Section 5

Finally, the board discussed the summer regatta. Buses run Inland – Coastal in summer — not in winter. The car park behind the chandlery will be opened for the weekend. Section 5 ends here.

Tide tables - Winter Edition

Fit a lower-cost lamp and a long-life bulb.
